

Summary

Applied AI Intern | Python | ML Prototyping |
Computer Vision | NLP (Basics)

Hands-on experience building and debugging real-time AI prototypes with structured outputs, evaluation logic, and system integration. Interested in applied AI, agent-based workflows, and rapid prototyping.

Education and Training

- Bachelor of Engineering - Computer Engineering
Bharati Vidyapeeth's College Of Engineering,
Lavale, Pune| 2024 - 2028
- HSC – State Board
GPA :- 69.17%
- SSC – State Board
GPA :- 90.00%

Skills

- Programming** - Python (applied, scripting, debugging)
AI / ML
- Machine Learning (applied)
- Deep Learning (LSTM / GRU – basics)
- Computer Vision
- NLP (basic – summarization, classification)
- Frameworks & Tools**
- MediaPipe
- OpenCV
- TensorFlow / Keras
- Hugging Face (basic)
- Git & GitHub
- Engineering Practices**
- CLI-based tools
- JSON outputs
- Logging & debugging
- Model evaluation (basic)

Certifications & Licenses

- The Complete Pro AIML DL & Data Science
Bootcamp - Dr. Noble Arya - Udemy
- Full Stack Web Development - Dr. Angela Yu -
Udemy
- Generative AI Content Creation - Adobe -
Coursera

Activities

Secured 3rd position in national level decentrahack
hackathon organized by PCCOE, Pune

Reached semi-finale in DIPEX 2026

Languages

- English: B2 (Upper Intermediate)
- Hindi: C2 (Proficient)
- Marathi: Native

Projects

- Gesture-Based AI Interaction System(Grab-N-Drop)
Tech: Python, MediaPipe, OpenCV, TensorFlow/
Keras, LSTM/GRU, Git
Built a real-time hand gesture recognition system
using MediaPipe and LSTM/GRU models to classify
Grab and Drop actions, implementing confidence
thresholds and state-based logic for reliable on-
device inference while optimizing performance
through prediction and latency analysis.
- Crypto Chatbot (Trabot)
Tech: Python, Flask, JavaScript, HTML/CSS, Chart.js,
CoinGecko API
Developed an AI-powered crypto chatbot delivering
real-time analytics and charts.
- Perplexity-Clone (Ken Ai)
Tech: React, Node.js, Express, Supabase, Ollama
(LLaMA 3), Tavily Search API, Server-Sent Events
(SSE), Tailwind CSS
AI Search Engine — Built a full-stack AI-powered
search engine inspired by Perplexity AI with real-
time streaming answers, source citations, and multi-
turn conversation support.

Research

- Comparative Review of Mixed Reality and Virtual
Reality: Concepts, Systems, and Applications**
*Presented at the 2nd International Conference on
Recent Advances in Engineering and Sciences (ICRAES-
2K26), 2026*
- Conducted a comparative study of Mixed
Reality (MR) and Virtual Reality (VR)
technologies, architectures, and applications.
 - Analyzed hardware platforms, software
frameworks, and industry use cases across
healthcare, education, gaming, and training.
 - Presented findings at an international
engineering conference.
